

Helping industry measure up!

MACHINE PROBE INSTALLATION AND TRAINING

June 2015

Manufacturers:

- ◇ Heidenhain
- ◇ Renishaw

Please call us @ 989-723-4115 to discuss your specific machine for a custom package price to suit your specific needs.

Prices vary based on:

- ◇ Probe Manufacturer
- ◇ Accuracy/Repeatability of Hardware
- ◇ Wired/Wireless Communication to your NC
- ◇ Amount of Training Required

Packages starting at \$11,500.00 including basic training!

We offer turnkey packages including installation of all hardware and software components as well as provide full training packages and aftermarket NC measurement software including CAPPS NC CMM style reporting direct from your Machine Tool. Packages for Heidenhain, Fanuc, Mitsubishi, and other NC controlled machinery.

Facts:

- With proper use, a machine touch probe can pay for itself just in saved setup time!
- Return on investment is seen typically within 6 months of installation.
- A machine touch probe in combination with machine artifacts can allow you to trace, monitor, and compensate for Dynamic Machine changes over time.

Offering only the Highest Quality Renishaw and Heidenhain Probing Systems.
